Dear Sirs, it was a very pleasurable experience purchasing a Solar heating system for my home from your company.

From the beginning your service, from presentation, quotation to installation was hassle-free and very professionally performed. The presentation made by [REDACTED] in my home was informative and far superior to that made by any of the other companies whom I had approached. On the basis of this presentation I was able to understand fully the intricate details of the system.

The main reason for selecting your product was that it is extremely efficient, unobtrusive and can be monitored easily by the very versatile computer control system.

I must also mention that the installation was carried out by a very efficient and knowledgeable team who performed their work professionally and left no debris and mess in my home.

The electrical inspection and subsequent visit by [REDACTED] to verify that all was in order reinforced my view that I had chosen the right firm for the job.

The system started performing immediately with no problems whatsoever and the benefits are already apparent.

Once again let me thank you all and I have no reservations in recommending your company to anyone wanting to install solar water heating.

Yours sincerely,

Prof. Jacquie Greenberg
