

Thanks for email.I should have long ago advised you how happy I am with your product!! I find that with an outside temperature of 19 I can already switch off the electricity as the unit reaches maximum temperature.I also notice a large saving on my electrical account every month much to my glee.I would have no hesitation in recommending your product both cost wise as well as efficiency wise.Having at the time done much research on a suitable unit I am extremely pleased that I chose your unit.Full marks as well to your installation team.

Kind regards,
